DETAILED ACTION

Oath/Declaration

1. Oath and declaration filed on 8/6/2003 is accepted.

Information Disclosure Statement

2. The prior art documents submitted by applicant in the Information Disclosure Statement filed on January 13, 2004 and August 6, 2003 have all been considered and made of record (note the attached copy of form PTO – 1449).

Allowable Subject Matter

3. Claims 1 – 16 are allowed.
4. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 2, 8, and 15, for example which include a method for designing a broad band wire grid polarizing beamsplitter and method

comprising defining a desired range of incidence angles and a desired spectral band of the incident light and defining desired polarization contrast ratios within the spectral band and desired minimum acceptable light efficiencies and selecting initial design parameters for the wire grid pitch and the width of the individual composite wires and the selecting the materials which comprises the dielectric substrate, the individual metal layers and the individual dielectric layers and varying the design parameters in a selective and iterative manner until the desired performance for both the reflected polarized light and the transmitted polarized light is obtained (claim1) ; and a transparent substrate, forming an array of parallel metal elements with intervening grooves on the substrate and depositing a dielectric layer on the metal elements and depositing alternate layers metal elements and dielectric layers to create stacks which comprises an array of composite wires and etching the dielectric optically transparent materials and to create intervening grooves filled with dielectric material (claims 2, 8, 13 and 15).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Katsuragawa et al (5,991,075) discloses light polarizer and method of producing the light polarizer.

Silverstein et al (6,714,350 B2) discloses double sided wire grid polarizer.

Garvin et al (4,289,381) discloses high selectivity thin film polarizer.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
